BOOK SYNOPSIS

"Building upon the wide range of selections and the extensive historical coverage that marked previous editions, this new compilation stretches from the earliest attempts to define the cinema to the most recent efforts to place film in the contexts of psychology, sociology, and philosophy, and to explore issues of gender and race. Reorganized into eight sections - each comprising the major fields of critical controversy and analysis - this new edition features reformulated introductions and biographical headnotes that contextualize the readings, making the text more accessible than ever to students, film enthusiasts, and general readers alike. The seventh edition also integrates exciting new material on feminist theory, queer cinema, and global cinema, as well as a new section, "Digitization and Globalization," which engages important recent developments in technology and world cinema."
